

FACT SHEET

Updated: 2.20.21

Leucadia Blvd/ Hygeia Avenue Avenue Roundabout

PROJECT STATUS

Project design is complete. Currently finishing easement acquisition and finalizing utility relocation design.

ABOUT THE PROJECT

This project will construct a roundabout at Leucadia Boulevard and Hygeia Avenue in Leucadia. This new roundabout will complete the original three roundabouts contemplated for the Leucadia Boulevard corridor between Orpheus Avenue and Vulcan Avenue. The intersection will be regraded to provide a flatter road profile at the roundabout. The project includes landscape enhancements and sidewalk improvements as well.

BENEFITS

- Improved safety for vehicles and cyclists by eliminating left turns and reducing conflict points.
- Better pedestrian mobility through the corridor by adding new sidewalk.
- Improved traffic flow through the corridor by removing the stop sign at Leucadia Boulevard and Hygeia Avenue.
- Enhanced aesthetics through new landscaping, trees and improved street lighting.
- Reduced greenhouse gases by eliminating required stopping.

PROJECT BUDGET

The current budget for this project is \$3,118,000 and includes project planning, design, environmental analysis and partial construction funding. Additional funding is needed to fully fund construction.
